

Three pedals. Six speeds. Endless smiles. The manual 911 Carrera S returns.

13/08/2026 Variant of 911 Carrera S built with six-speed manual exclusively for North America.

Responding to overwhelming customer demand, Porsche is bringing the six-speed manual transmission back to the 911 Carrera S in North America. The Carrera S, which initially transitioned into the 992.2 generation exclusively with an eight-speed PDK is now joined by the new 911 Carrera S with MT Package. The new 911 Carrera S with MT Package is exclusive to North America. The package includes an elevated standard equipment list compared to 911 Carrera S, while prioritizing analogue driving and minimizing additional weight. The formula builds on the successful foundation set by the Carrera T to offer an even sportier option to the Carrera model family that begs for backroads and taking the long way home.

In North America, Porsche now offers seven variants of the 911 with a conventional manual transmission. The 911 Carrera T Coupé and Cabriolet models represent the entry point to the range. On

the opposite end of the model family, the 911 GT3, 911 GT3 with Touring Package, and 911 GT3 S/C offer the combination of a manual gearbox mated to a motorsport engine and chassis that deliver the pinnacle of analogue, enthusiast-focused driving. The new 911 Carrera S with MT Package – in Coupé and Cabriolet form – prioritize the joy of driving over maximum acceleration while offering an even more powerful engine and a much wider range of personalization options than the 911 Carrera T models.

The model, which is offered exclusively in a rear-wheel drive layout, gains rear-axle steering, a PASM Sport suspension that lowers ride height by 10 mm, a walnut shift knob, the Sport Chrono Package and unique exhaust tuning as standard equipment. Centre lock wheels – offered for the first time on a 911 Carrera S model – are standard as well and save more than 7 kg over the standard 911 Carrera S wheels. Four-way Sport Seats Plus and Titanium exhaust outlets with black trim also contribute to the complete package along with a standard SportDesign front fascia. A red "S" model designation on the rear rounds out the visual differentiation, a detail born from a modification liked by North American enthusiasts. The 14-way Sport Seats, the 18-way Sport Seats Plus, and Folding Lightweight Bucket seats made of carbon fibre are available as added-cost options.

Powered by the 473-hp 3.0-litre twin-turbo flat-six, the new model offers a powerful and well-balanced setup meant to be equally rewarding in corners and straight-line acceleration. The curb weight of the 911 Carrera S Coupé with MT Package is just 1,509 kg – only 5 kg above that of the 911 Carrera T Coupé. As with other Carrera S model variants, the standard brake system uses cast iron discs measuring 408 mm (front) and 380 mm (rear) with six-piston fixed calipers in the front and four-piston fixed calipers in the rear. Customers can also optionally specify Porsche Ceramic Composite Brakes (PCCB) and carbon fibre bucket seats for further weight savings. The ability to specify PCCB is another area where the new model distinguishes itself from the Carrera T.

The 911 Carrera S with MT Package can be specified with a full range of interior and exterior personalization options available across the wider 911 lineup, offering broad customization potential. This includes 17 exterior paint colours, and – subject to availability – both Paint to Sample and Paint to Sample Plus options for virtually limitless personalization. More than 70 leather interior configurations are also available to provide a wide range of materials-based colour combinations and trim options.

Porsche also offers optional exterior and interior packages to give the new model an even more distinctive appearance. The exterior package includes HD-Matrix Design headlights in black with a white colour ring, wheels finished in Ceramica, the "S" in the rear model designation in red and rear PORSCHE lettering in white, and side view mirror lower housings painted in body colour. Special puddle lights casting the six-speed manual shift pattern are also included in this package.

The interior package adds Plaid Sport-Tex fabric seat centres with stripes in Chalk. The seat belts and stitching match the seat stripes, which complement interior trim pieces in Ceramica with black brushed aluminium accents. The face of the Sport Chrono clock on the dashboard also gains a white accent ring, and the door sill guards are finished in brushed black aluminium.

Pricing and arrival timing

Customers interested in the new 2027 911 Carrera S with MT Package may place an order through a Porsche Centre starting today. The starting MSRP is $177,500 for the Coupé and $191,800 for the Cabriolet. Deliveries are expected to begin by the end of 2026.

About Porsche Cars Canada, Ltd.
Porsche Cars Canada, Ltd. (PCL) is the exclusive importer and distributor of the Porsche 911, 718 Boxster and 718 Cayman, Taycan, Panamera, as well as Cayenne and Macan. Headquartered in Toronto, Ontario, PCL employs a team of more than 70 supporting sales, aftersales, marketing, retail development, and public relations. They, in turn, work to provide Porsche customers with a best-in-class experience in keeping with the brand's more than 75-year history of leadership in the advancement of vehicle performance, safety, and efficiency. In 2019, a Parts Distribution Centre opened its doors in Mississauga to service the countrywide network of 23 Porsche Centres. Located in Pickering, ON, the Porsche Experience Centre Toronto opened its doors in 2025. PCL is the dedicated subsidiary of Porsche AG, headquartered in Stuttgart, Germany.

At the core of this success is the brand's proud racing heritage that boasts some 30,000-plus motorsport wins to date.
